STATE OF THE ART COLD STORAGE FACILITY

OUR OUR STORY

Vardhman is a well-established name in Madhya Pradesh. We have multiple prospering businesses and are amongst the top players in the fields of construction.

Agriculture being the most important contributor to the GDP of India and the majority of the population thriving on the agricultural sector, we felt that it was our moral duty to promote this sector even further, hence we decided to start our own cold storage units. Our cold storage is not just an ordinary storage warehouse, we have Madhya Pradesh's only controlled atmosphere chambers equipped with imported machinery from Italy and Poland to ensure that the vegetables and fruits remain in the best of conditions even after months.

We could be your next big supplier or the next big buyer of fruits and vegetables.

Let's grow together and make stronger and better India.
